

# FAST COMPANY

A PLAY BY CARLA CHING

Meet the Kwans—a Chinese American family of expert con artists, grifters, and thieves. But when daughter Blue masterminds a Very Big Score, things hit the fan for the whole family, including her brothers, Francis and H, and their mother, Mable. It's a race to see who will come out on top in a fast-paced game full of twisty turns and questionable motives, in this fun, stylish crime caper.

One part *Oceans Eleven*, one part *The Italian Job*, one part *The Grifters*, with a liberal seasoning of David Blaine, *Fast Company* is a romp through the world of con men,

with four not so reliable tour guides. The MacGuffin is a near mint copy of *Action Comics #1*, the world's most valuable comic book, and crosses and double crosses are par for the game. Equal parts comedy and drama, *Fast Company* is a fun train of brinksmanship and bravura, that'll

make you reconsider if Asian Americans really are the model minority.
